FACT SHEET

AWL-1000E

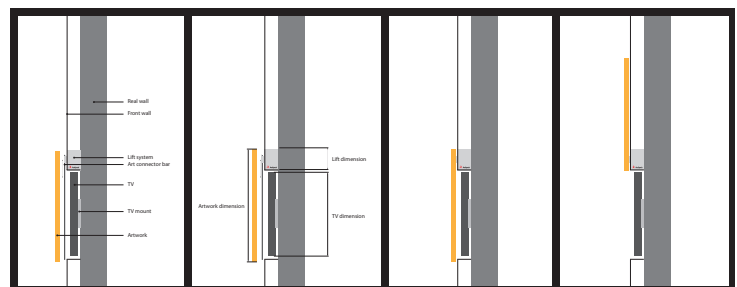

Wall mounted lift system for paintings and works of art with a max. travel of 1000 mm.

The AWL lift has been designed to lift a work of art vertically, to reveal a flat panel television that is mounted in a niche in the wall behind.

This plug-and-play system consists of a compact and silent motor, and a frame with adjustable mounting points to mount the artwork. The motor unit can be integrated in the wall behind, right over the niche where the flat panel is located. The housing can be offered in various RAL colours. Low tension motors make this system as silent as possible.

- ▲ **For screens up to 50 inch**
- ▲ **Silent drive**
- ▲ **Easy installation**
- ▲ **Available in different models**
